

Brand Guidelines

WHAT THIS PRODUCT IS FOR

Most tools report what is wrong. Actio decides who is fixing it.

The rules in this document exist so that sentence is believable to someone who has been let down by this category before. That reader is the reason the brand is quiet.

65%

of employees say nothing happens after a survey

41%

actual response rate at 1,000–5,000 employees

37%

have seen change since the previous survey

Defining the brand

What Actio is for, who it speaks to, and how it writes. The design rules in section two follow from these pages.

Who we are

Principles

Personality

Voice

Messaging

Audiences

Who we are

Purpose

When an employee tells their employer something is wrong, a named person fixes it and the employee is told what happened.

Category

Employee listening and action management. Sold to operations as retention infrastructure rather than to HR as a culture programme.

Parent

Actio is a product of Lumofy. It replaces the former Lumofy Engage sub-brand, whose marks in both English and Arabic are retired.

Actio is the accountability layer for employee feedback.

Everything else in this document exists to make that claim survive contact with a workforce that has stopped believing survey software.

What Actio does

The situation

Organisations collect feedback well and act on it badly. Roughly two thirds of employees believe nothing happens after a survey. Participation falls, the data degrades, and each round is worth less than the last.

The mechanism

Every issue is classified by who has the authority to change it, assigned to a named owner with a date, and held open until evidence of the change is attached.

The outcome we measure

The measures are first-90-day attrition, closure rate and median days to close, rather than a sentiment score.

TODAY

Survey

Dashboard

Deck

Nothing

WITH ACTIO

Survey

Route by authority

Named owner and date

Evidence attached

Employee told

Why routing is the product

A team lead cannot change pay bands, shift rotation or career structure. Sending those findings to that person guarantees they are not fixed, and teaches the workforce that answering is pointless.

Actio separates what a manager can solve from what operations, leadership or a protected case channel must solve, and tracks each to closure separately.

Principles

Plain

State mechanics rather than promises. An employee shown exactly what their manager will see trusts the system more than one who is reassured that it is confidential.

Accountable

Nothing is marked closed without evidence. The product holds its users to the standard it sells, and the brand holds itself to the same one.

Restrained

One accent colour, one border weight, one motion curve. Restraint is how the product signals that it is instrumentation rather than marketing.

Honest about limits

Publish real figures including unflattering ones, and say clearly when something cannot be changed. A refusal with a reason keeps people answering.

Built for the frontline

Small screens, second languages, shared devices and no corporate email are the default conditions, not edge cases.

Protective

Anonymity is engineered rather than asserted. Reports of misconduct leave the engagement workflow entirely and are handled as cases.

How to use them

These are tie-breakers. When two options are equally good, prefer the one that is plainer, more accountable, more restrained, more honest, more frontline-ready or more protective.

When they conflict

Protection takes precedence over plainness, and plainness over restraint. A screen may be made less elegant to keep someone safe, and less restrained to make something unmistakable.

A decision that none of these six would have changed was an aesthetic decision, and should be described as one.

Personality

The register

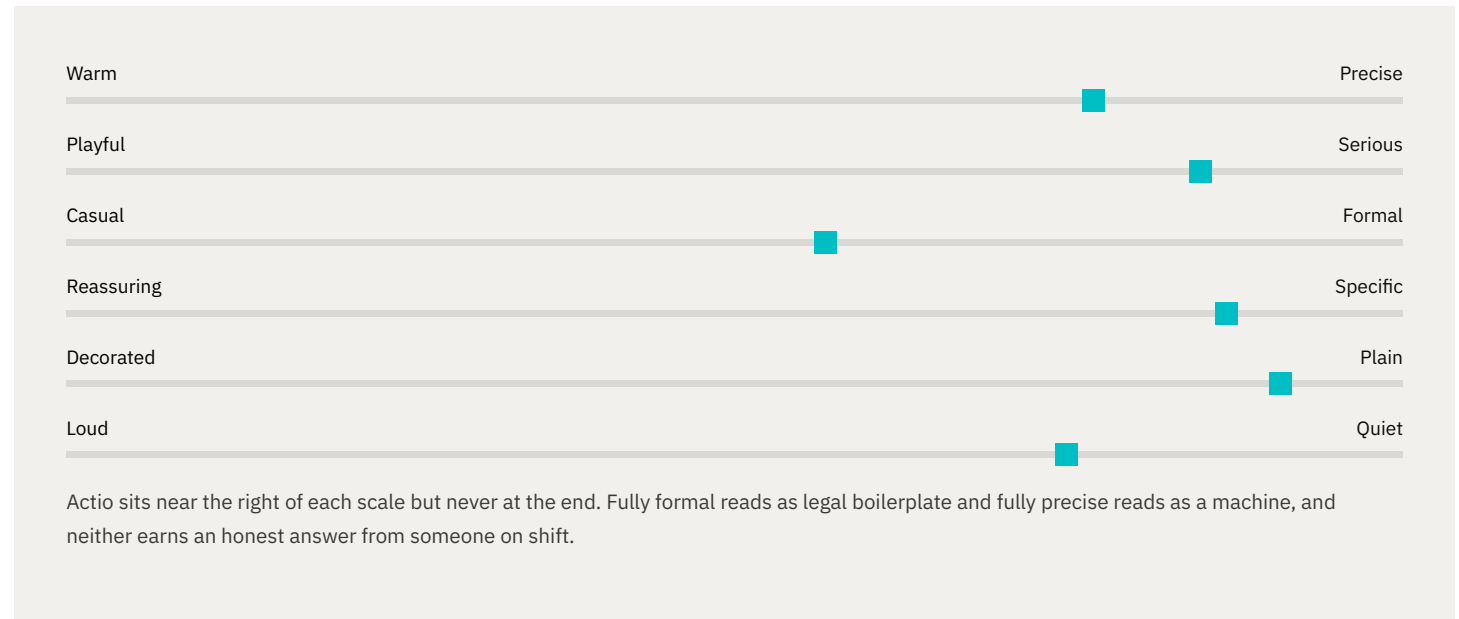

Actio writes the way a competent operations lead speaks: someone who has already read the file, knows what happened, and is telling you what is being done about it.

What it is not

Actio is neither a companion nor a coach. It has no name it speaks in and it does not use the first person.

Why this matters most to employees

Someone deciding whether to answer honestly is assessing risk. Enthusiasm reads as a sales pitch. Precision reads as a system that will behave predictably.

Voice

Sentence case

Everywhere, including buttons and headings. Capitals are reserved for proper nouns and for monospace labels at 12px.

Numbers before adjectives

Write 41% responded with the sample size attached, rather than describing participation as strong.

Name the person and the date

Assigned to Dewi, due 14 March carries more information than any status word.

Say what cannot be done

A stated limitation with a reason keeps people answering the next round, where silence does not.

Words we do not use

empower, seamless, unlock, leverage, journey, supercharge, delight, effortless, revolutionise, game-changing, moments that matter, listening strategy, people leader

Punctuation

No exclamation marks in system copy. No emoji anywhere in the product. Em dashes sparingly and never more than one in a paragraph.

Register by reader

Employee	Shortest sentences. Describe the mechanism, not the intention.
-----------------	--

Team lead	Lead with the action and the deadline.
------------------	--

Operations	Volume, trend and where the load falls.
-------------------	---

Executive	The number first, then the structural reading.
------------------	--

Errors	What happened and the next step. No apology.
---------------	--

Privacy	Precise and unhurried. Never soften a limitation.
----------------	---

Writing standards

The pattern

The approved column names a person, a number, a date or a mechanism. The rejected column names a feeling or an intention.

Where it applies

Product interface, email, WhatsApp, sales material, the website and support replies. There is no separate marketing voice.

One check

If a competitor could publish the sentence unchanged, it carries no information.

Approved

Assigned to Dewi, due 14 March

3 of 8 actions closed this cycle

We cannot change pay bands this quarter. The budget is set until July.

41% responded (n=612)

You are crushing it this quarter

We are looking into it

Great engagement!

Escalating to leadership

Oops, something went wrong

Your response is completely anonymous

Completed

Keep up the momentum

Schedule communication is an opportunity area

Messaging

Hierarchy

Use the shortest form the context allows. The longer forms are expansions of the same claim and should never contradict it.

Tagline	Feedback that closes.
One sentence	Actio routes employee feedback to whoever can actually fix it, and does not let it close without proof.
Short form	Engagement tools send every finding to the frontline manager, including pay, staffing, shift patterns and career paths, which that manager has no power to change. Actio routes each issue to whoever can change it, and it stays open until they do.
Boilerplate	Actio is the employee listening and accountability product from Lumofy. It is built for high-attribution frontline operations in Southeast Asia and works over WhatsApp, SMS and web in Bahasa Indonesia, English and Tagalog.

Spoken to an operator

A hundred seats costs you around three million dollars a year in attrition. Your engagement survey hands the reasons to a team lead who cannot change shift structure. We hand them to the person who can, and prove it closed.

Spoken to an investor

Every incumbent monetises measurement, and two thirds of employees say nothing happens with it. We monetise closure instead, in the one vertical where retention sits on the operating line rather than the culture budget.

Do not lead with artificial intelligence in any of these. It describes how the product works, not what it is for.

Audiences

Frontline employee

Answers on a phone, often in a second language, often mid-shift, and is deciding whether honesty carries a cost.

HOW WE WRITE FOR THEM

Shortest register. Show what the manager will be able to see before the answer is submitted.

Team lead

Receives only what they can act on. Has twenty minutes between shifts, not two hours.

HOW WE WRITE FOR THEM

One action at a time with the reason attached.
Never a heatmap and never a score to defend.

Operations and workforce planning

Owns rosters, staffing and process, and rarely sees engagement data today.

HOW WE WRITE FOR THEM

Structural findings framed as operational load, with volume, trend and affected headcount.

Site director or COO

Feels attrition as a cost line and signs the contract.

HOW WE WRITE FOR THEM

Money, closure rate, and what remains unowned.
No culture vocabulary.

The buyer is not the user

Operations signs the contract and the frontline answers the questions. Copy written to impress the buyer will be read by someone with less patience and considerably more at stake.

Avoid the vocabulary of the category

Nobody in this list describes themselves as a people leader or talks about a listening strategy. Use survey, issue, owner, deadline and closed.

Design elements

The mark, the palette, the typography and the interface, with the measured value behind each decision.

The seal

The form

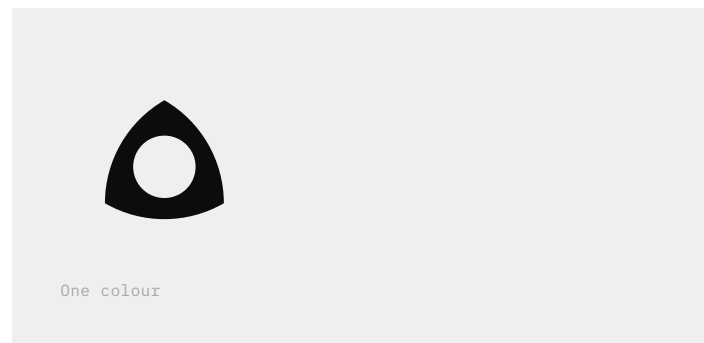

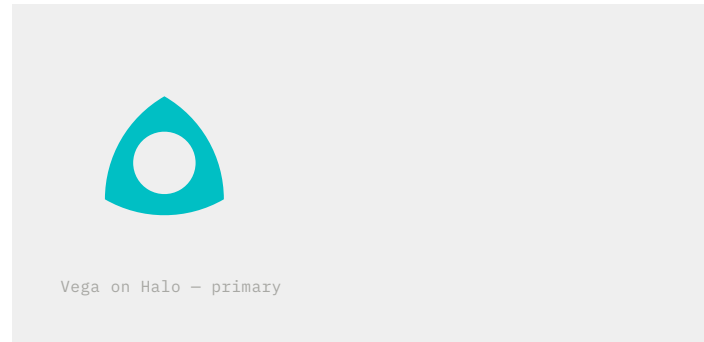

The mark is a Reuleaux triangle with a circular aperture. A Reuleaux triangle is a curve of constant width: rolled beneath a flat plane, the plane does not rise. A circle behaves the same way.

Why this form

Two constant-width shapes nested. The product argues that a commitment should measure the same on the day it is made and the day it is checked.

Reading

It reads as an A at large sizes and as a seal at small ones. A seal is applied to something once it has been verified and closed, and recording that moment is what the product does.

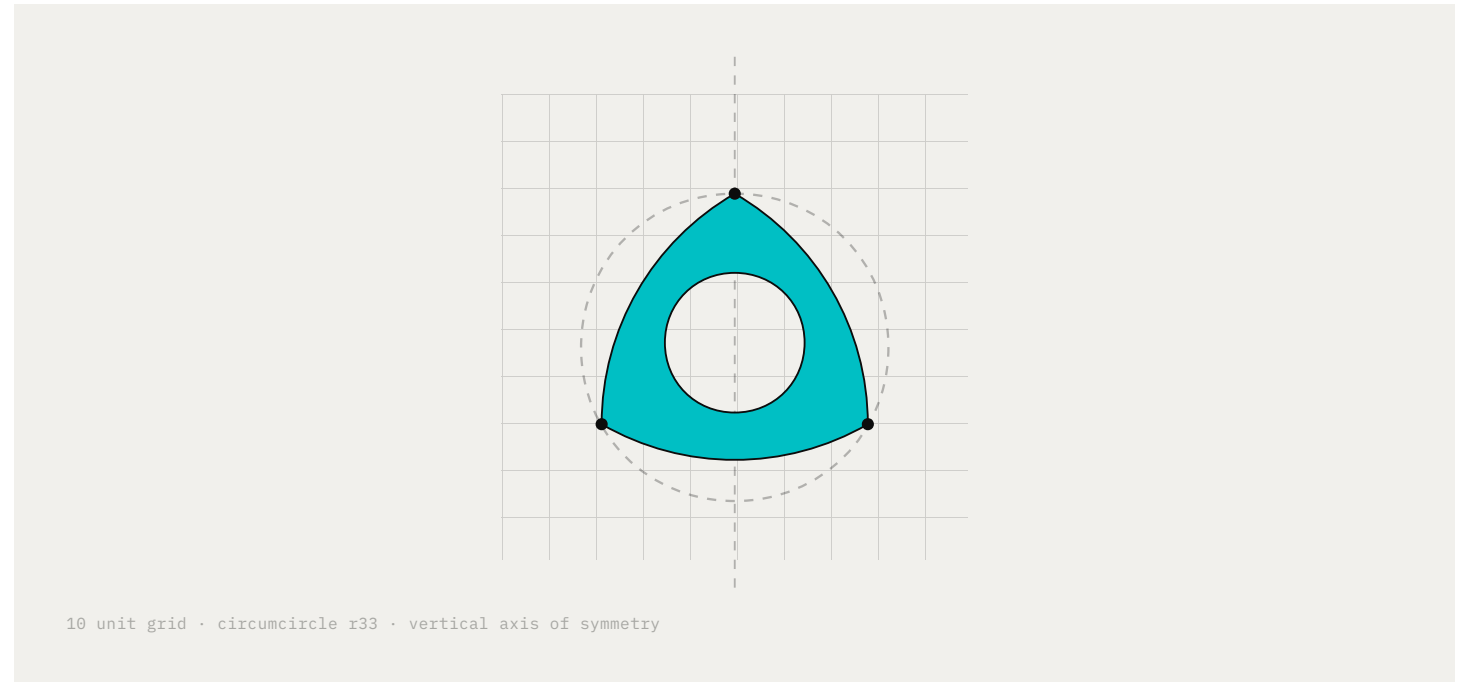

Construction

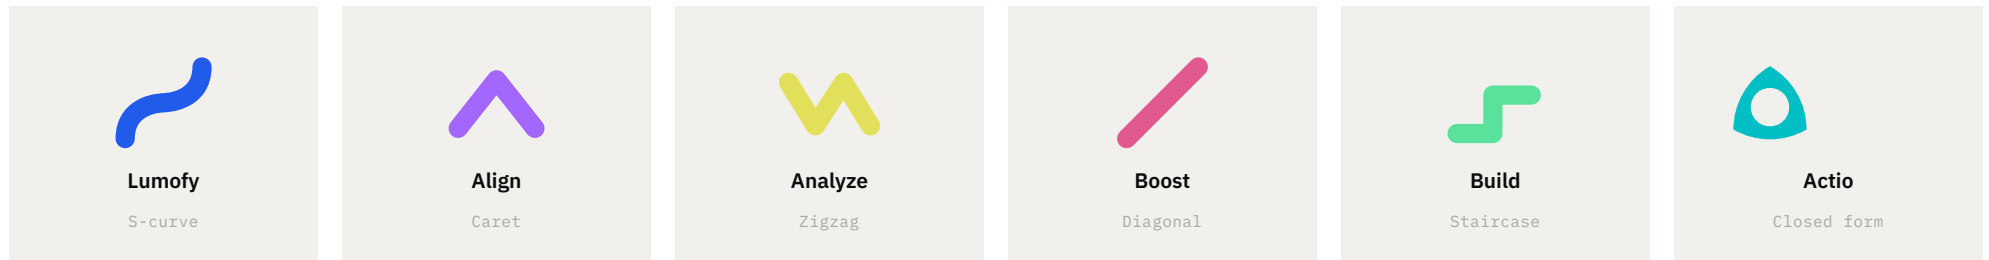

Grid	100 × 100 units
Form	Reuleaux triangle
Circumradius	33
Vertices	−90°, 30°, 150° on the circumcircle
Side and arc radius	57.158 (R√3)
Arc centres	Each arc is centred on the opposite vertex
Optical centre	50, 54.4
Aperture	r 15 at 50, 53.4
Thinnest wall	13.6 units
Fill rule	evenodd
Gradient	None

Do not redraw

The arcs are mathematically defined. A version drawn by eye will be measurably wrong and will read as wrong beside a correct one.

The Lumofy family

The grammar

Every Lumofy mark is a path drawn in one system: discs at grid points joined by connectors of equal width, with a gradient fade. Each product owns a different path.

What Actio owns

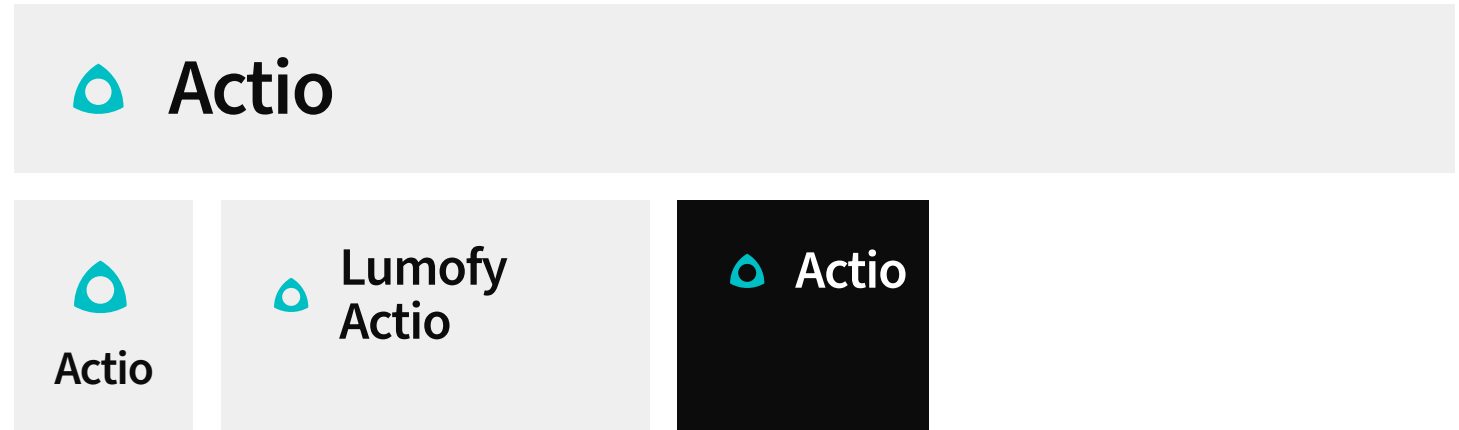

The only closed form in the family. Every sibling mark travels from one point to another. This one returns to where it started.

Two departures

The seal is solid rather than stroked and carries no fade. Both are legibility decisions: the mark has to survive a 16px favicon, a stitched garment and a one-colour stamp.

Lockups

Horizontal	Primary. Use in almost all cases.
Vertical	Square spaces only.
Seal alone	App icons, favicons and avatars.
Parent lockup	First commercial use, contracts and the site footer.
Gap	One aperture diameter. Derive it from the mark; never type a pixel value.
Wordmark	Source Sans 3 SemiBold at $-0.025em$, supplied as outlines. Never set as live text.

Clear space and size

Clear space

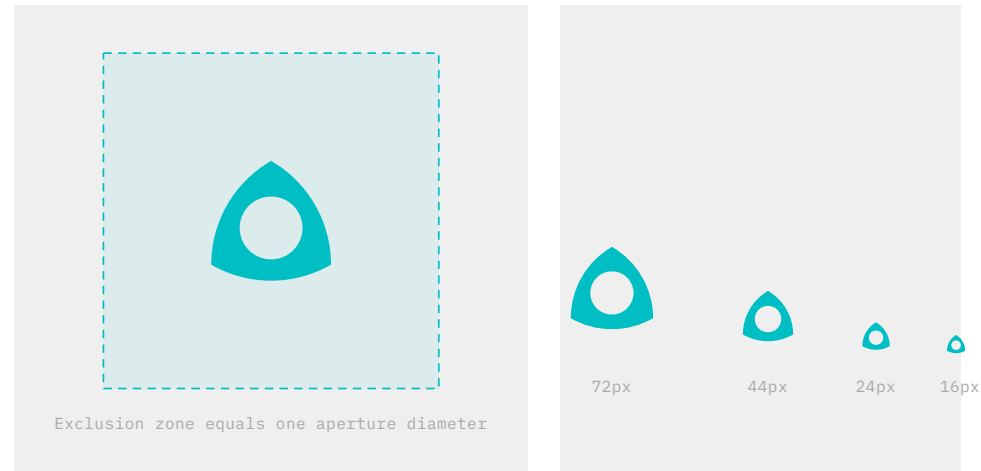

One aperture diameter on every side, which is 30 units at mark scale. Nothing enters that field, including type, rules and other marks.

Minimum size

16px or 6mm for the seal. 84px or 24mm for the horizontal lockup.

Below 24px

Ship the supplied raster rather than scaling the vector. The aperture begins to fill on low-density screens and the mark reads as a solid triangle.

Backgrounds

Approved grounds

White, Halo, Ink 50, Cosmos and Vega 400. No other colour, including sibling accents.

On Cosmos

White and Vega are both approved. Vega on Cosmos measures 8.62 to 1.

On Vega

The seal and wordmark are Cosmos. White on Vega measures 2.27 to 1 and must not be used.

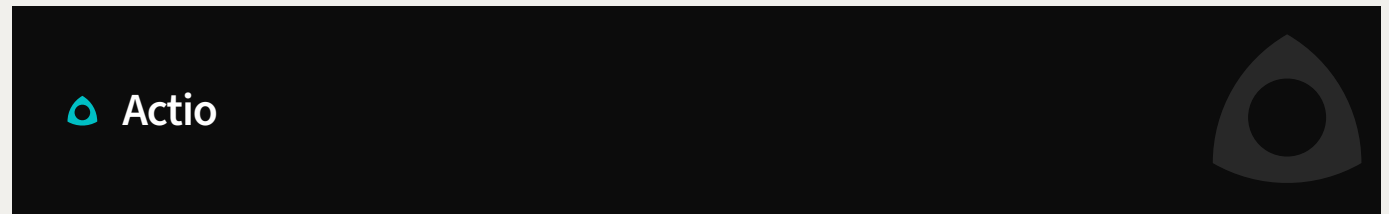

On photography

Place the lockup on a solid plate. The mark is never set directly over an image.

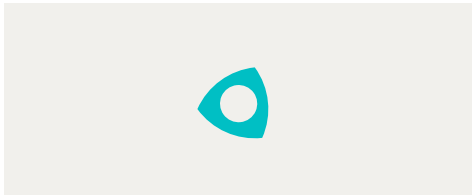

App icons

iOS	Cosmos ground, Vega seal, system superellipse mask
Android	Adaptive icon, Vega on Cosmos, 108dp with a 72dp safe zone
Favicon	Dedicated 32 and 16 rasters. Do not scale the vector.
Avatar	400 × 400, seal at 56% of the frame
Open graph	1200 × 630, Cosmos ground, lockup at the left
Slack and Teams	512px source, Vega on Cosmos

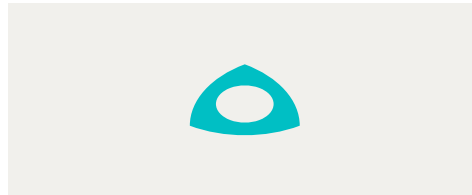

Open graph image, 1200 × 630

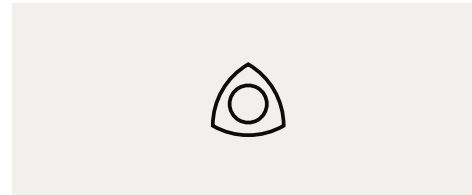

Misuse

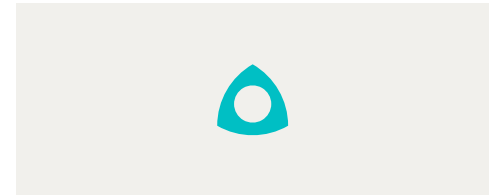

Rotate

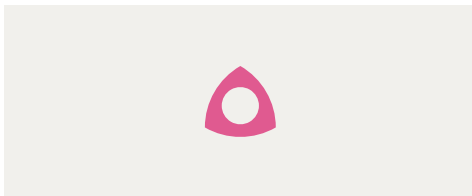

Stretch

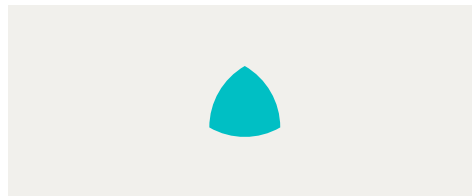

Outline

Shadow

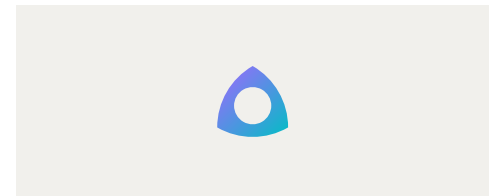

Recolour

Fill the aperture

Add a container

Gradient

Also prohibited

Cropping the mark, using it as a bullet or a repeating pattern, animating it beyond the approved reveal, placing it over a photograph without a plate, and redrawing it in another application.

Third parties

May use the horizontal lockup unmodified, with correct clear space, to state that their product integrates with Lumofy Actio. May not use the seal alone, incorporate the name into their own, or apply either to merchandise.

Reporting

Anything shipped that breaks this page is a defect rather than a variation and should be raised as one.

Colour: core

Inherited

Cosmos and Halo come from Lumofy and carry most of the interface.

Owned

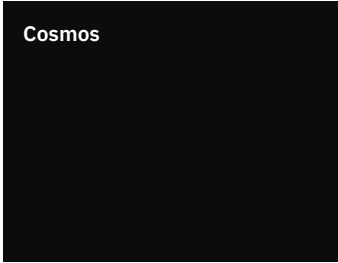

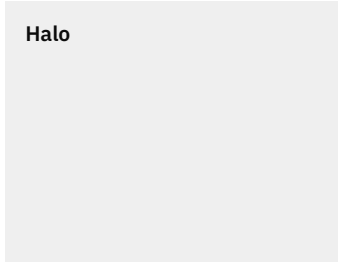

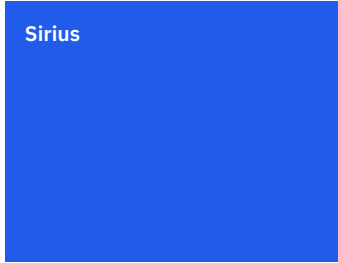

Vega is the Actio accent and the only colour the product owns.

Restricted

Sirius belongs to Lumofy. It appears in the account switcher and the parent wordmark and nowhere else. A second accent inside the product makes the suite read as incoherent.

The name

Vega was the pole star around twelve thousand years ago and will hold that position again.

			
Cosmos	Halo	Vega 400	Sirius
#0C0C0C Text and dark surfaces	#EFEFEF Page and card surfaces	#00BFC4 Accent, fills, the mark	#215BEA Lumofy parent only

Colour: the wheel

Position

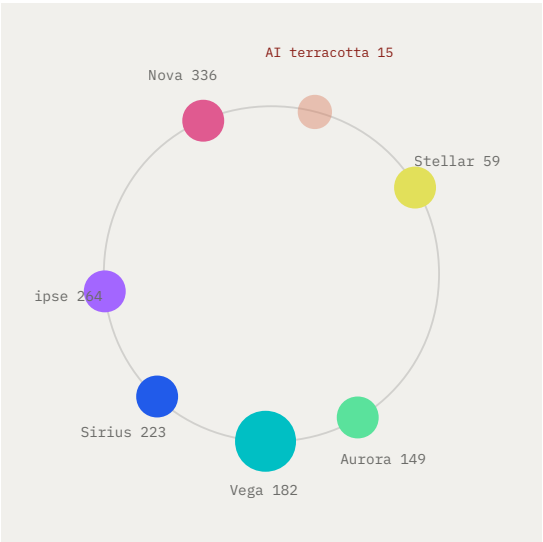

Each product owns one hue. Vega occupies the only remaining gap, 33 degrees from Aurora and 41 from Sirius. That is far enough to be unmistakable and close enough to belong.

What it avoids

Vega sits 159 degrees from the terracotta now associated with consumer AI assistants. The retired Engage orange sat eight degrees from it, which is effectively the same colour, and that is why it was not carried into Actio.

Rule

A sibling hue never appears in an Actio interface, including in charts. Where a categorical scale needs more than three values, use the Vega scale with neutrals.

Stellar 59°	Analyze
Aurora 149°	Build
Vega 182°	Actio
Sirius 223°	Lumofy
Eclipse 264°	Align
Nova 336°	Boost

Colour: the Vega scale

Two rules

Vega 400 measures 2.27 to 1 against white and is never used for body text.

Cosmos on Vega 400 measures 8.62 to 1, so the correct pattern is dark text on a Vega fill. For Vega text on a light ground, use Vega 600 or darker.

Why this is worth stating twice

Reversing it is the most likely accessibility failure in this brand, and teal reads as darker than it measures.

Vega 50	#E6FAFB	Tinted rows and selected states
Vega 100	#B4F0F2	Badges, chart fills and hover tints
Vega 200	#6FE0E5	Secondary chart series
Vega 400	#00BFC4	The brand colour: fills, the seal
Vega 500	#00A2A8	Hover state on Vega 400
Vega 600	#017E85	Text and links on light grounds
Vega 700	#02646B	Text on Vega 50 and 100
Vega 800	#03474D	High emphasis and small type
Vega 900	#022E33	Deep accents on dark surfaces

Colour: neutrals

Where the work happens

Around ninety per cent of any Actio surface is neutral. The accent is punctuation.

Text floor

Ink 500 at 5.35 to 1 is the lightest permitted body text. Ink 300 is for placeholders and disabled states, where low contrast is the message.

One border

Ink 150 is the only rule weight in the product. Where a boundary needs more emphasis, use space rather than a heavier line.

Opacity

Never apply opacity to text. It multiplies against whatever sits behind and drifts between surfaces.

Colour: status

Separate from the brand

Status colours are a distinct set and are not drawn from the Lumofy accents. A user who works across the suite would otherwise misread them.

Protected

Violet is used deliberately so that a misconduct report does not read as an error or an overdue task. It is a different kind of item and the colour says so before the label does.

Red

Overdue is the only red in the product. Reserving it is what keeps it meaningful in a queue.

Never colour alone

Every status carries a written label. A user with deuteranopia loses nothing.

Open	Raised, not yet assigned	#6B6B68
In progress	Owner assigned, within deadline	#017E85
Overdue	Past deadline and escalating	#B4251F
Closed	Verified with evidence	#1D7A56
Protected	Handled as a case, outside the queue	#5B3FA8

Routing lanes

Team lead	Operations	Leadership	Protected
Workload, one to ones	Rosters, staffing	Pay, career, policy	Misconduct and safety

Colour: proportion

Seventy, twenty, ten

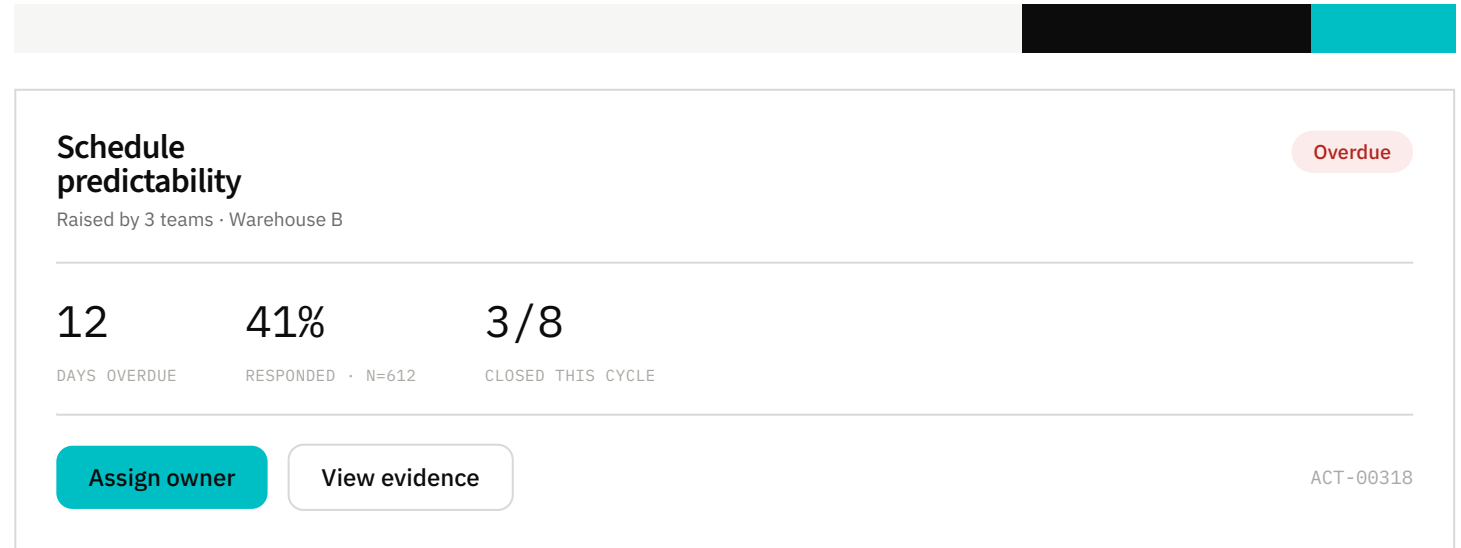

Roughly seventy per cent neutral surface, twenty per cent Ink text and ten per cent Vega.

One accent per view

The accent marks the routing lane and the single primary action. Where two elements both read as primary, neither is.

Why it is a rule

The product is sold on being calm and predictable. A screen carrying three accent elements contradicts the claim before anyone reads the copy.

One accent element. Everything else is neutral.

Colour: accessibility

Standard

WCAG 2.2 AA. Body text at 4.5 to 1, large text and interface components at 3 to 1.

Measure, do not estimate

Every pair on this page has been measured. Any new pair is measured before use.

Non-text contrast

Focus rings, chart series, status indicators and input borders each need 3 to 1 against what sits next to them.

Type: Source Sans 3

Use

Headings only, in weights 600 and 400. Never 300 and never 800.

Setting

Sentence case with optical kerning. Tighten to -0.015em from 22px and -0.03em above 40px.

Source

The variable successor to Source Sans Pro named in the Lumofy sheet. Pin the weight axis rather than relying on synthesis.

Substitution

None is permitted. If the face fails to load the fallback is Georgia, which is visibly wrong and therefore gets fixed.

Aa Bb Cc Dd Ee Ff Gg Hh Ii Jj Kk Ll

Ww Xx Yy Zz 0123456789

Regular 400 — the issue was raised on 3 March

SemiBold 600 — closed with evidence on 14 March

Feedback that closes

Type: IBM Plex Sans

Use

All body and interface text, in weights 400, 500 and 600.

Why this face

Plex was drawn as an engineering typeface and carries genuine idiosyncrasy in the a, g and l. Against the interchangeable geometric sans faces used across this category, it reads as a face that was chosen.

Two weights in body

400 and 600. Weight 300 collapses on the low-cost Android handsets that frontline users actually carry.

Hosting

Self-hosted WOFF2, subset to Latin, Latin Extended and Arabic. Never a public CDN: a blocked request means an unreadable survey.

Aa Bb Cc Dd Ee Ff Gg Hh Ii Jj Kk

SemiBold 600 — cannot be closed without evidence

Type: IBM Plex Mono

Every number

Response rates, days to close, counts, dates, case identifiers and currency all set in Plex Mono.

Why

A monospace numeral reads as instrumentation. It is one specification that does more for the credibility of this product than any illustration would.

Tabular figures

Enabled on all numeric columns so that values align on the decimal at every magnitude.

Also used for

Labels at 12px with 0.02em tracking, identifiers, timestamps and captions.

Type rules

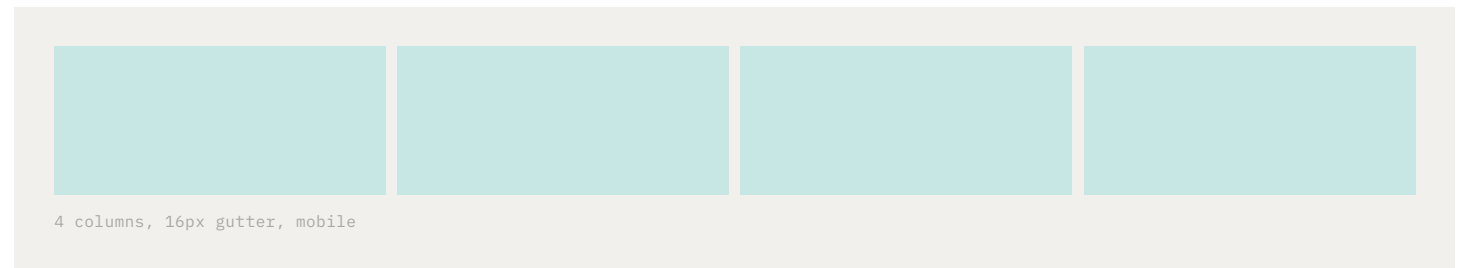

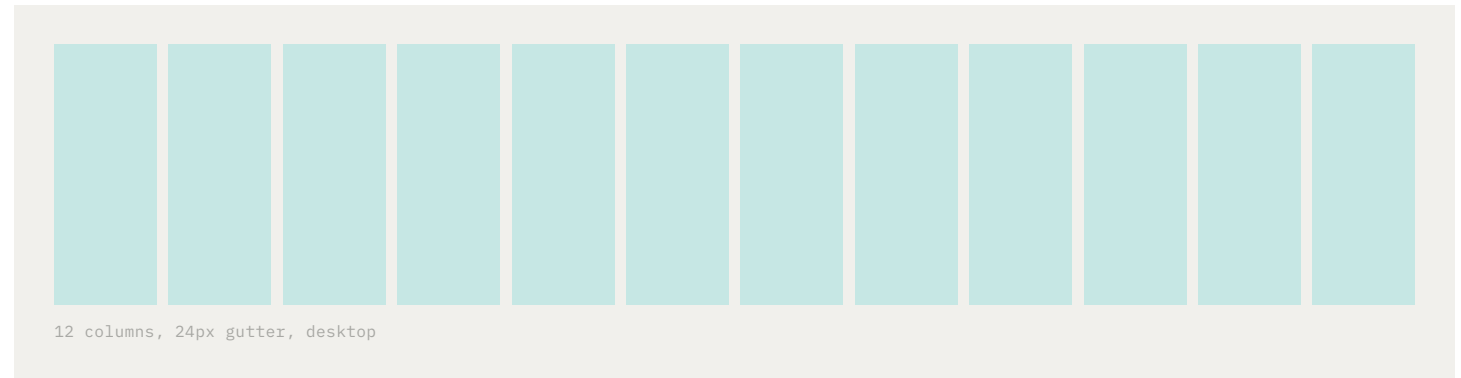

Always		Never		Why the measure rule breaks most often
Case	Sentence case	All caps	Except Plex Mono labels at 12px	
Measure	68 characters maximum	Title case	Anywhere, including buttons	A full-width paragraph on a desktop dashboard is unreadable. Constrain the container rather than reducing the type size.
Numerals	Plex Mono, tabular	Letterspaced lowercase	Under any circumstances	Loading
Alignment	Left, never justified	Weight 300	Fails on low-density screens	Use font-display swap with metric-matched fallbacks so that layout does not shift when the face arrives.
Body weights	400 and 600 only	Italic for emphasis	Use weight 600 instead	Testing
Headings	No single word on the last line	Underline	Except links in running text	Check every screen at 200 per cent browser zoom. Nothing may clip or overlap.

Grid

Desktop	12 columns, 24px gutter, 1440 maximum, 64px margin
Tablet	8 columns, 20px gutter, 32px margin
Mobile	4 columns, 16px gutter, 16px margin
Breakpoints	480, 768, 1024, 1440
Reading width	720px
Data width	1200px
Baseline	8px

Mobile is the target

Most Actio sessions happen on a phone. Design the 360px view first and allow the desktop layout to inherit from it.

Spacing

Base unit

Four pixels. Every measurement in the product is a multiple of it.

Why the scale is short

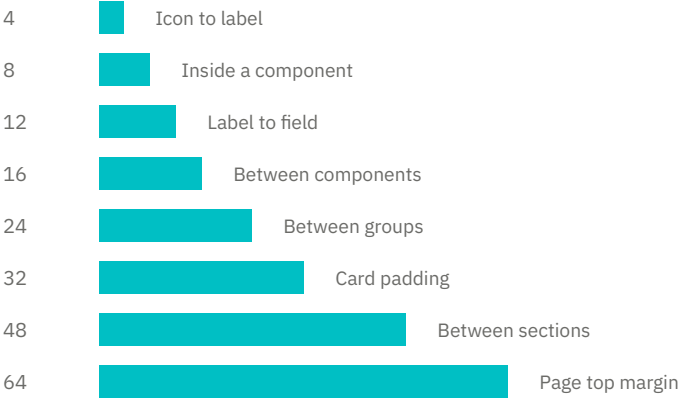

Eight values force consistent decisions. A continuous scale produces drift between screens built by different people, and that drift is what makes a product look assembled rather than designed.

Defaults

Eight inside a component, sixteen between components, twenty-four between groups and forty-eight between sections.

Not permitted

Values of 14, 18, 20 and 30 do not exist in this product.

Radius and elevation

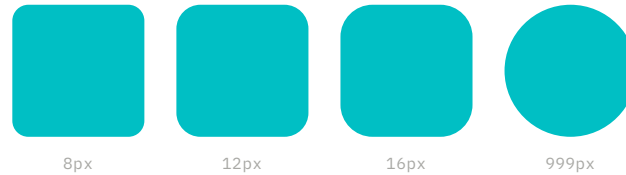

Controls	8px, for buttons, inputs and selects
Cards	12px
Pills and tags	999px
Modals	16px
Single sided borders	0, always
Images	8px, or none when full bleed

Elevation

Nothing in the document flow carries a shadow. Cards are separated by a hairline and by space. Only overlays lift, using a single shadow token.

A common error

Rounded corners on an element with a border on one side only. A left accent rule always has a radius of zero.

In flow

Hairline and space only.

Overlay

The only shadow in the system.

Left accent, radius zero

Rounding one side of a partially bordered element always reads as a mistake.

Operations and workforce planning ▼

Zero to ten scale

0 1 2 3 4 5 6 7 8 9 10

Disabled

Locked until an owner is assigned

Labels

Always above the field, never inside it. Placeholder text disappears the moment someone types, and a user returning to a half-completed form has lost the question.

Placeholders

Show a real example of valid input. Do not repeat the label and do not prefix with e.g.

Validation

On blur rather than on keystroke, with the message inline beside the field. No summary at the top of the form and no red border without an explanation.

Touch

Minimum 48 by 48 pixels. The zero to ten scale is the most tapped control in the product and is used one handed.

Queue and status

The lane rule

The left rule shows who owns the item. The pill shows where it has reached. These are never merged into a single colour.

Protected rows

No title, no detail and no assignee. The row appears so that the count reconciles and nobody wonders where an item went.

Sort order

Overdue first, then in progress by deadline, then open, then closed. Never sort by severity: severity is a judgement and a deadline is a fact.

Dates

Plex Mono, right aligned, so that a long queue scans vertically.

Depot, Bekasi	7%

Cards and rows

An issue is an object and takes a card. A queue is a list and takes rows. A list of forty issues rendered as cards cannot be scanned.

No nesting

A card never contains another card. Where content inside a card needs grouping, use a hairline and space.

Identifiers

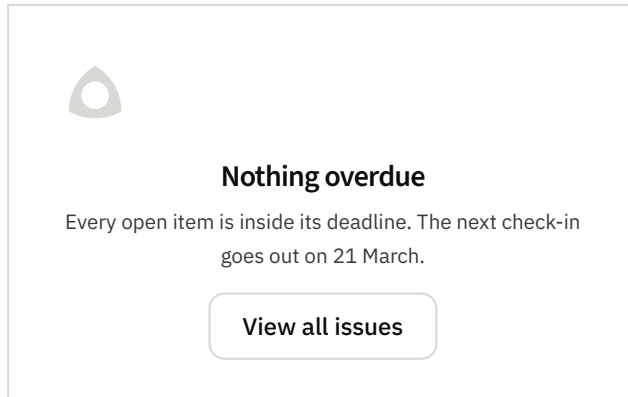

Every card carries its identifier in Plex Mono at the lower right. It is how support conversations locate an item.

Metric cards

No border and no card chrome. These are readings rather than objects.

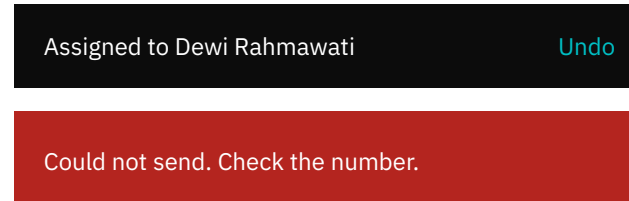

Notices

Empty state

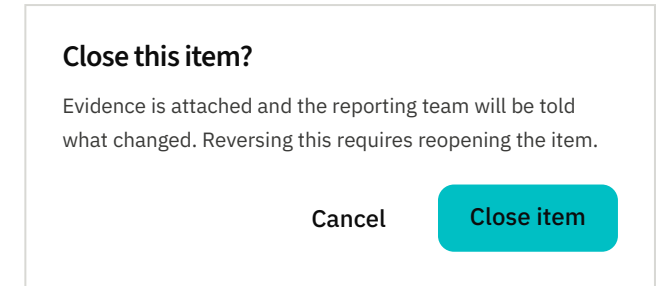

An empty state is an invitation. It never opens with an apology or with the words nothing here yet.

Toast

A toast states a fact in the past tense, with one undo affordance when the action is reversible. It does not congratulate.

Modal

Modals interrupt for irreversible decisions only. The title asks the question, the body states the consequence, and the primary action repeats the verb from the title.

Charts

Palette

Vega 400 is the primary series, Ink 500 the comparison and Vega 200 the secondary. No other colour appears in a chart. The Lumofy accents are not used as a categorical scale, because a rainbow of hues encodes nothing that the reader can decode.

Sample size

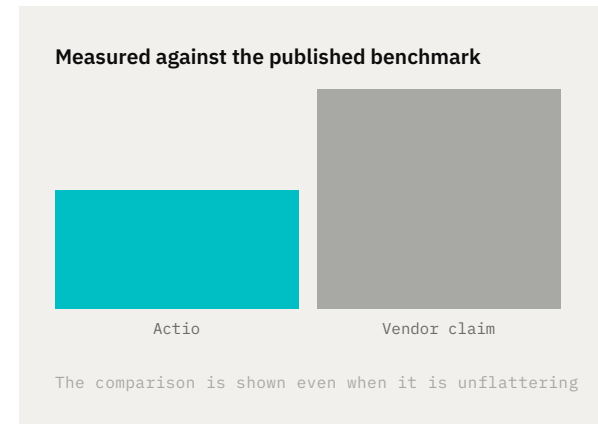

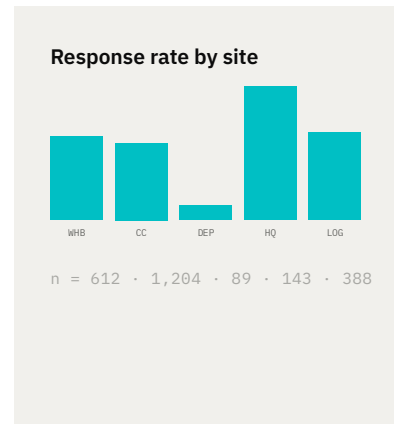

Always shown beside a percentage. This product argues against inflated benchmarks, and a figure that hides its base contradicts that argument.

Typography

Axis labels and all figures in Plex Mono with tabular figures enabled.

Not permitted

Pie charts above three slices, three-dimensional effects, dual axes and truncated value axes.

Icons

Construction

Line only, 1.5px stroke on a 24 pixel grid, with round caps and joins so that they sit with the mark.

Library

Tabler or Lucide as the base. Two libraries are never mixed on one screen, because the stroke terminals differ and the inconsistency is visible.

Filled icons

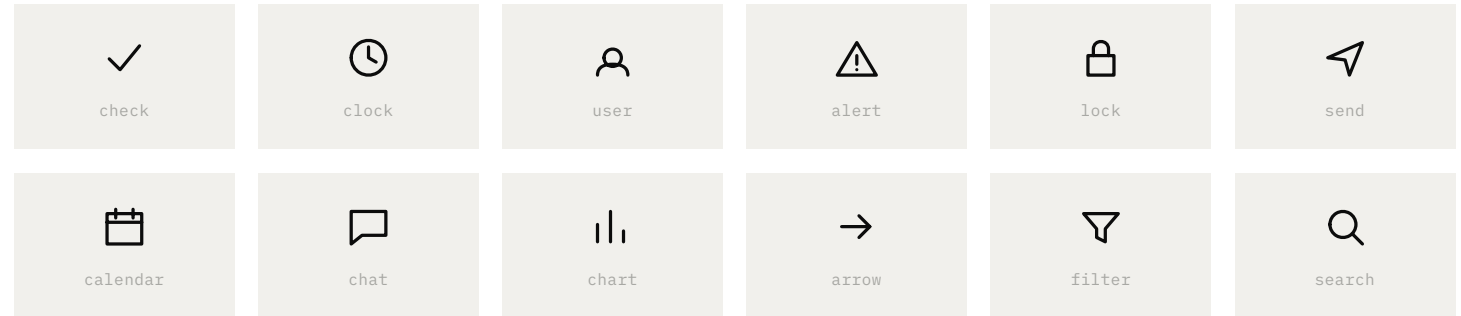

Only for the active navigation state.

Never alone

An icon is never the sole carrier of meaning, including in a dense toolbar. Pair with a label.

Artificial intelligence

No sparkle, star or wand. Actio does not advertise its AI.

Motion

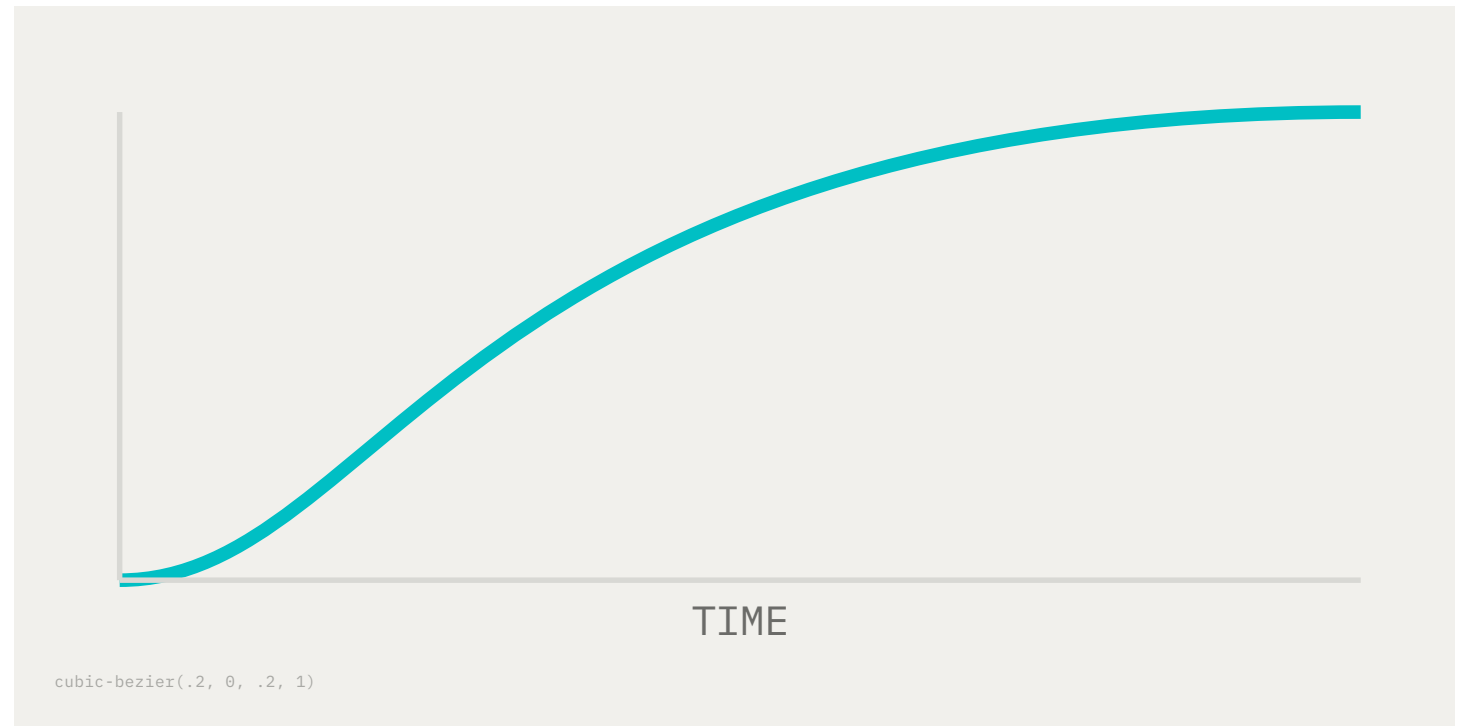

Micro	120ms, cubic-bezier(.2, 0, .2, 1)
Panel	200ms, same curve
Maximum	300ms
Easing	One curve throughout. No spring and no overshoot.
Reduced motion	Respected on every transition without exception
The mark	One approved reveal: the aperture scales from 0.9 to 1 over 200ms

What never animates

Numbers counting up, charts drawing themselves, skeleton shimmer, and anything that delays information reaching someone who is mid-shift.

Implementation

Transform and opacity only. Animating layout properties causes reflow on the low-cost devices this product runs on.

Dark mode

Page	#0C0C0C
Card	#1A1A18
Rule	#232320
Row rule	#1C1C1A
Primary text	#EFEFEF
Secondary text	#A8A8A4
Muted text	#6E6E69
Accent	#00BFC4, unchanged
Accent text	#6FE0E5
Status	Indicator dot only, label in secondary text

Not an inversion

Cosmos is the page. Surfaces separate by moving to a lighter grey rather than by casting a shadow, because a shadow is invisible against a near-black ground.

Status without chips

A five pixel dot carries the state and the label stays in secondary text. Filled status chips add saturated colour to every row and make a queue harder to scan, not easier.

Never pure white

Halo at #EFEFEF reduces halation on OLED screens read in darkness, which is when night-shift workers use this product.

Queue view. Page, rules, accent and four status indicators shown together.

Dark mode: status and text

Status in dark

● Open	#6E6E69
● In progress	#3ECFD4
● Overdue	#E4655B
● Closed	#4FB98A
● Protected	#9B86E0

Indicator colours are lightened for the dark ground so that each dot holds 3 to 1 against the page. The label stays in secondary text at every state.

Text on dark

Primary text on page	17.0:1
Secondary text	7.9:1
Muted labels	4.6:1
Accent text	11.2:1
Disabled	2.6:1, non-text only

Ratios are measured against #0C0C0C. Disabled text sits below the text threshold deliberately and never carries information on its own.

What changes and what does not

Accent	Unchanged at Vega 400
Accent text	Vega 200 replaces Vega 600
Borders	#33332F replaces Ink 150
Shadows	Removed entirely
Charts	Series unchanged; grid lines drop to #242422
Photography	Unchanged, no darkening filter

Testing

Both modes are verified on every screen before release. A colour that only works in one mode is not part of the system.

Automatic switching

Follow the operating system preference by default and allow an override that persists per device rather than per account, because a worker may use a shared handset.

The privacy preview

Why this screen exists

Employees do not believe that survey responses are anonymous, and no reassurance in a privacy policy changes that. The preview shows the mechanism instead, before the first question is answered.

What it states

The size of the group a response will be pooled into, the smallest group the system will report on, the fields a manager can filter by, and what happens to free text.

Where it appears

Ahead of every first response in a cycle, and available from a persistent link in every subsequent message.

Tone

Flat and mechanical. Any warmth here reads as persuasion, and persuasion is what the reader is guarding against.

Numbers are live

Every figure is computed for the reader in front of it. An illustrative number would be a claim rather than a disclosure.

Before you answer

Your answers are pooled with everyone at Warehouse B who joined in the last 60 days.

People in your group	23
----------------------	----

Smallest group we will report on	5
----------------------------------	---

Your manager can filter by	Site and tenure
----------------------------	-----------------

Free text is shown	Reworded, names removed
--------------------	-------------------------

If fewer than 5 people answer, nothing from your group is shown to anyone.

Start

ABOUT TWO MINUTES

No card, no shadow. A rule and a set of values carry the whole screen.

Navigation

Structure

Five destinations, flat. There is no second level of navigation, because every additional tier moves the queue further from the person who has twenty minutes to work through it.

Default

The queue opens first, filtered to items owned by the person signed in.

Mobile

The same five destinations as a bottom bar. Labels are always shown, never icons alone.

Account area

The Lumofy wordmark and product switcher live here, and this is the only place Sirius appears.

 **Actio**

Cycles

People

Evidence

Settings

Lumofy

Queue

Six night shifts in a row14 Mar

No path past senior agent28 Mar

Break room lighting—

Queue	Default view. Every open item, sorted by deadline.
Cycles	Survey rounds, their dates and response rates.
People	Teams and tenure bands. No individual records.
Evidence	Attachments against closed items.
Settings	Channels, languages, thresholds.

Tables

Rules		Site	Cycle	Responded	n	Open	Overdue
Header	Plex Sans 500 at 9px, Ink 500, one rule beneath	Warehouse B	04	41%	612	8	12
Row rule	Ink 150 hairline, no zebra striping	Contact centre, Jakarta	04	38%	1,204	14	4
Row height	44px, 52px on touch	Depot, Bekasi	04	7%	89	2	0
Numeric columns	Right aligned, Plex Mono, tabular figures	Depot, Karawang	03	52%	144	0	—
Text columns	Left aligned, truncated with a tooltip	Head office	04	66%	143	3	1
Sort	One column at a time, direction shown by a chevron	Numeric columns align on the decimal at every magnitude.					
Empty cell	An en dash, never blank and never zero						

No zebra striping

Alternating row fills add visual noise without improving scanning at this row height, and they break when a row carries a status ground.

Density

One density only. A compact mode encourages tables that are too wide for the phone screen most sessions happen on.

Numbers, dates and names

Numbers

Percentages	Whole numbers. One decimal only below 10%.
Sample size	Always shown as n=612 beside a percentage
Change	Percentage points, written as +4pp or -4pp
Counts	Thousands separated by a comma in English, a full stop in Indonesian
Currency	Rp 2.450.000 in Indonesian, IDR 2,450,000 in English

Dates and time

Format	14 Mar 2026. Never numeric only.
Relative	Used up to 7 days, then absolute
Deadlines	Absolute date plus days remaining
Time zone	The site time zone, labelled, never the reader's
Ranges	1–14 Mar, en dash, no spaces

Names

Display	Given name and family name as supplied. No reordering.
Single names	Supported. Never require a family name.
In assignments	Given name and initial: Dewi R.
In evidence	Full name as recorded in the source system
Never	Auto-generated initials as an avatar substitute

Truncation

Truncate at the end with an ellipsis and expose the full value on hover and on focus. Never truncate in the middle of a name.

Error and edge copy

Structure

State what happened, then what to do. Two sentences at most, and no apology.

Blame

Never attribute the failure to the reader. Could not send is correct; you entered an invalid number is not.

Recovery

Every message names the next action, and where the action is possible from that screen the control appears beside the message.

Not used

Oops, sorry, unfortunately, something went wrong, please try again later, an unexpected error occurred.

No connection	We could not reach the server. Your answers are saved on this device and will send when you are back online.
Send failed	Could not send to +62 812 3456 7890. Check the number and try again.
Group too small	Fewer than 5 people answered. Nothing from this group will be shown.
Cycle closed	This cycle closed on 14 March. Your answers were not recorded.
No permission	You can see items assigned to you and to your teams. This one belongs to another site.
Evidence missing	This item cannot be closed until a file or a note is attached.
Session expired	You have been signed out. Sign in again to continue where you were.
Nothing to show	No items are overdue. The next check-in goes out on 21 March.

Accessibility

Beyond contrast

Target size	48 × 48px minimum, including in tables
Focus order	Follows reading order. Every interactive element is reachable by keyboard.
Focus ring	Always visible. Never removed, never replaced by colour alone.
Labels	Every input has a persistent visible label
Icons	aria-hidden when decorative, aria-label when the only control

Motion and time

Reduced motion	Honoured on every transition
Timeouts	No session or form timeout inside a survey
Auto-advance	Never. The reader controls progression.
Animation	Nothing loops and nothing flashes

Language

Set the document language attribute per locale so that screen readers select the right voice, and mark inline language changes.

Testing

Keyboard-only traversal of every flow, a screen reader pass on the survey and the queue, and a check at 200 per cent zoom, before each release.

Devices

Test on a low-cost Android handset with a small screen, not only on a desktop browser at full size. That device is the majority case for this product.

Colour vision

Every status carries a written label as well as a colour, so nothing is lost to deuteranopia or protanopia.

Standard

WCAG 2.2 AA, with the contrast check running in continuous integration rather than as a manual review.

Arabic and language

Arabic is inherited from Lumofy and is a first-class setting rather than a translation layer. These pages define the wordmark, the typography, what mirrors and what does not.

Arabic: the wordmark

The name

Actio is transliterated as أكتيو. The name is not translated, because a product name is a proper noun and the Latin form appears alongside it in most contexts.

Lockup order

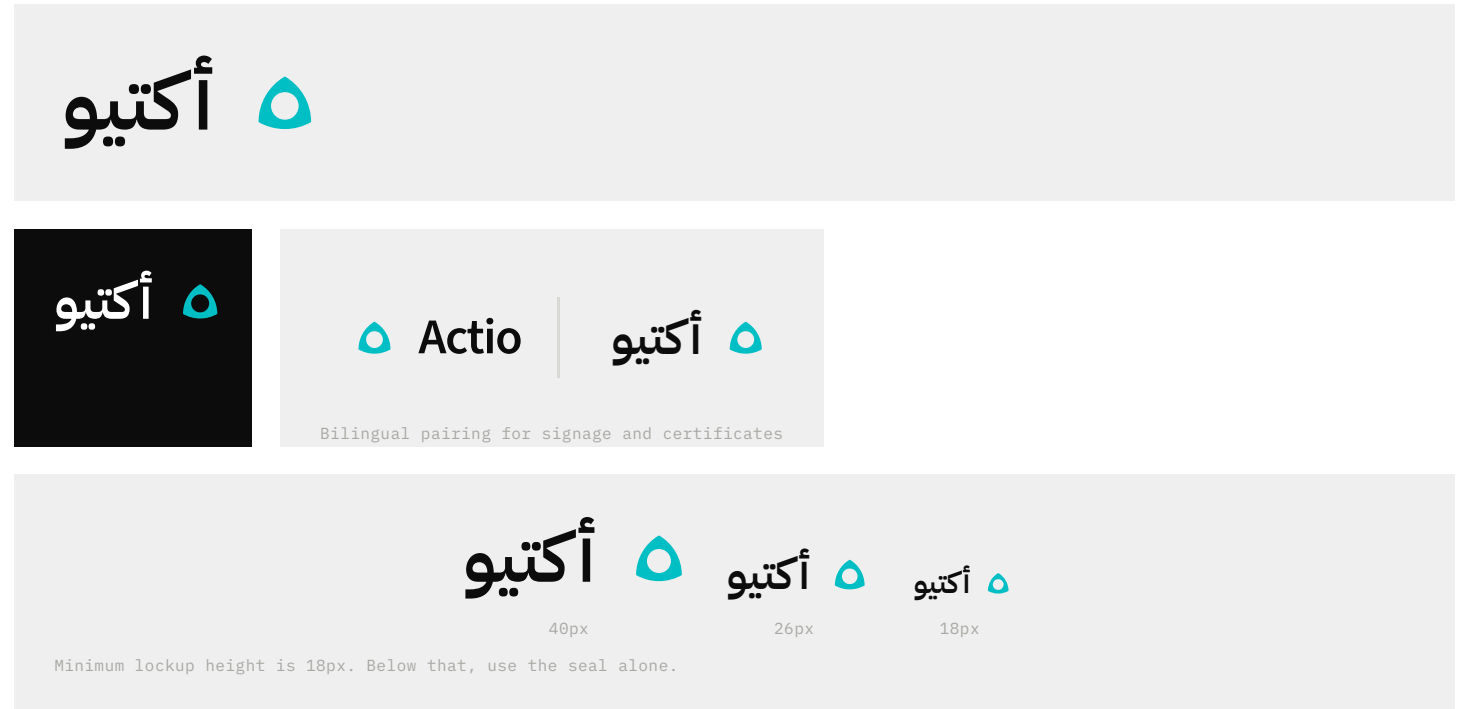

In right-to-left settings the seal sits to the right of the wordmark, so that the mark is encountered first when reading begins.

The seal does not mirror

The Reuleaux triangle is symmetrical about its vertical axis, so the mark is identical when flipped. Only the order of the lockup changes. Earlier guidance to mirror the mark itself was incorrect.

Setting

IBM Plex Sans Arabic SemiBold, with no tracking applied. The gap between mark and wordmark is one aperture diameter, matching the Latin lockup.

Arabic: typography

Face

IBM Plex Sans Arabic, in Regular, Medium and SemiBold. It is the companion to the Latin face already in the Lumofy stack, so the two share proportion and colour on the page.

Size

Set Arabic one to two points larger than the equivalent Latin size. Arabic letterforms carry more detail at the same point size and lose it first on small screens.

Line height

Increase by fifteen to twenty per cent over the Latin setting. Ascenders, descenders and any diacritics need the room.

Weights

Regular for body, Medium for interface labels, SemiBold for headings. Never synthesise a bold: the letterforms distort and joins break.

أ ب ت ث ج ح خ د ذ ر ز س ش ص ض ط ظ ع غ ف ق ك ل م ن
ه و ي

عادي ٤٠٠ – تم رفع هذه المسألة في الثالث من مارس

متوسط ٥٠٠ – أُسندت إلى ديوي، الموعد النهائي ١٤ مارس

شبه عريض ٦٠٠ – لا يمكن الإغلاق دون دليل

الأرقام تبقى لاتينية: ACT-00318 · 14 Mar 2026 · 612 · 41%

Western Arabic numerals in all locales, set in Plex Mono

Arabic: mirroring

The principle

Mirror what carries reading direction. Leave alone what carries physical or numerical direction.

Implementation

Use logical CSS properties throughout: inline-start and inline-end rather than left and right, and margin-inline rather than margin-left. A layout built this way mirrors without a second stylesheet.

Testing

Every screen is reviewed in Arabic before release, not translated after layout is signed off.

Layout and columns	Mirrors Reading order reverses, so navigation, tables and forms all flip.
The seal	Does not mirror Symmetrical about its vertical axis. Identical when flipped.
Lockup order	Mirrors Seal moves to the right of the wordmark.
Directional icons	Mirror Arrows, chevrons, back and forward, indentation, progress.
Non-directional icons	Do not mirror Clock, search, calendar, lock, chart, user.
Numerals and figures	Do not mirror Numbers read left to right inside a right-to-left line.
Charts	Do not mirror Value axes keep their conventional direction; labels move to the right.
Media controls	Do not mirror Play and skip follow the tape, not the script.
Progress and sliders	Mirror Fill originates from the right.
Phone numbers and code	Do not mirror Always left to right, regardless of surrounding direction.

Arabic: writing

Never letterspace

Arabic letters join. Tracking breaks the connections and produces text that reads as damaged rather than as emphasised.

No synthetic styling

There is no italic in Arabic and a synthesised bold distorts the letterforms. Use the real weights that ship with the family.

No capitalisation

Arabic has no case. Emphasis comes from weight or from position, never from a capitalised form.

Justification

Do not use kashida elongation to justify text in the interface. Set ragged and let the line end where it ends.

Punctuation

Use the Arabic comma , the Arabic semicolon ؛ and the Arabic question mark ؟. The full stop is shared with Latin.

Numerals

Western Arabic figures throughout, in Plex Mono. Eastern Arabic numerals are not used, so that a single number format is readable across every locale the product runs in.

Dates

Gregorian, written as ٢٠٢٦ مارس ١٤ in prose and as 14 Mar 2026 in tables and identifiers.

Mixed strings

Latin product names, identifiers and phone numbers stay in Latin script and left-to-right order inside an Arabic sentence.

Translation is not the last step

Arabic copy is written against the same standards as English: name a person, a number, a date or a mechanism. A literal translation of a soft English sentence produces a soft Arabic one.

Register

Modern Standard Arabic for all product copy. Dialect is not used, because the workforce spans several and none of them is neutral.

Length

Arabic typically sets around fifteen per cent shorter than English, so an interface designed to hold Bahasa Indonesia will accommodate it, though this should still be checked on a device.

Review

Every string is read by a native speaker on a physical device before release.

Bilingual settings

When both appear

Bilingual lockups are used on physical signage, certificates and contracts. In the product interface only one language is shown at a time, selected by the user rather than by location.

Order

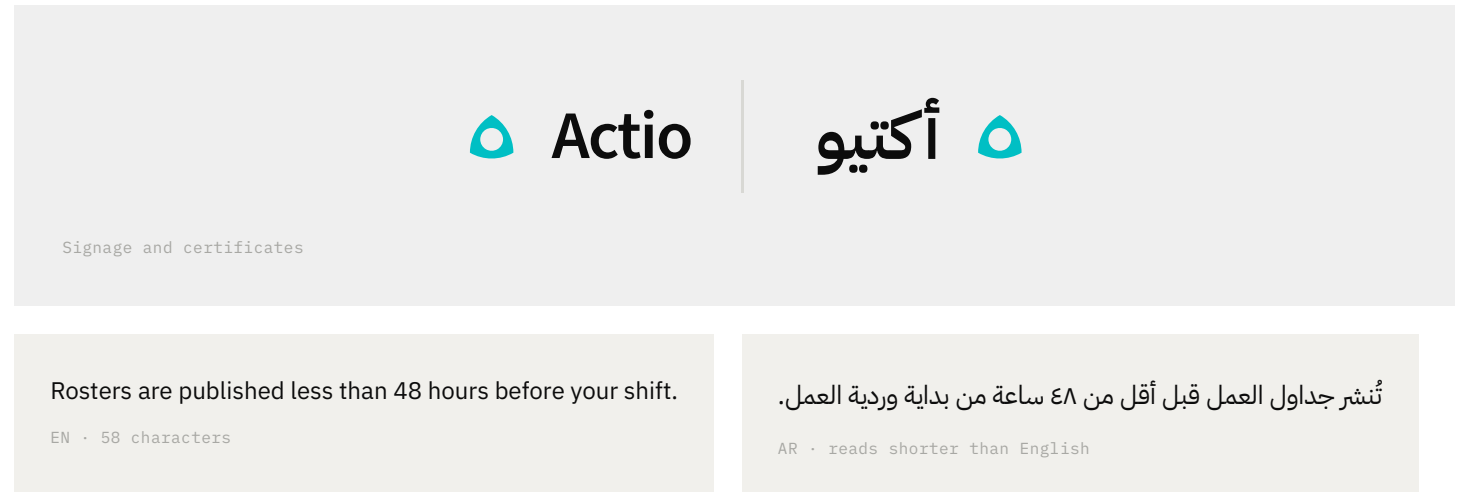

Arabic first in right-to-left markets, Latin first elsewhere. Separate the two with a hairline rule at full height rather than with a slash or a bullet.

Weight matching

Arabic and Latin at the same nominal size read as different weights. Set the Arabic one point larger and check optically rather than numerically.

Matching the parent

The Actio Arabic wordmark is set to sit at the same optical weight as the existing Lumofy Arabic marks. Where the two appear together, match by eye at final size rather than by nominal point size.

Indonesian and Tagalog

Launch locales

Bahasa Indonesia, English and Tagalog, with Arabic inherited from Lumofy.

Length

Bahasa Indonesia runs fifteen to twenty per cent longer than English and Tagalog can run further. Design every label and button to absorb the longest string rather than the English one.

Plurals

Never concatenate a string containing a count. Indonesian and Tagalog form plurals differently from English and the result will be wrong in a way that nobody on the team can read.

Names

Support users with a single legal name. Many Indonesian employees have one, and a form that demands a surname will exclude them.

Rosters are published less than 48 hours before your shift.

EN · 58 characters

Jadwal kerja diumumkan kurang dari 48 jam sebelum giliran Anda.

ID · 63 characters · +9 per cent

Inilalabas ang roster nang wala pang 48 oras bago ang iyong shift.

TL · 66 characters · +14 per cent

Idiom

No idioms, metaphors or wordplay in any locale. The reader is frequently on a small screen, in a second language, in a noisy room, between tasks.

Governance

Channels, imagery, what to avoid, and the legal and asset position before the first line of product code.

Channels

Imagery

Off brand

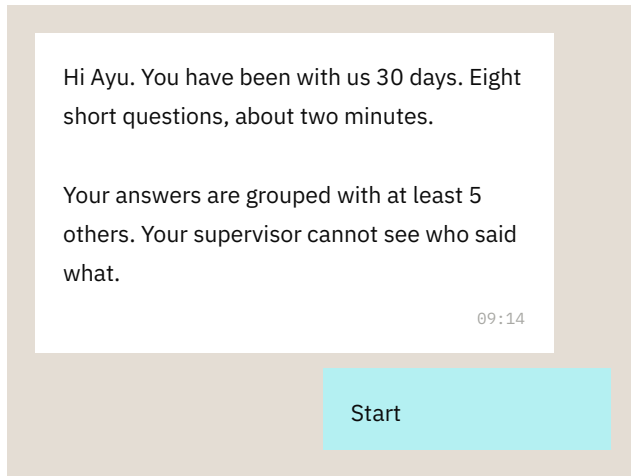

Naming

Trademark

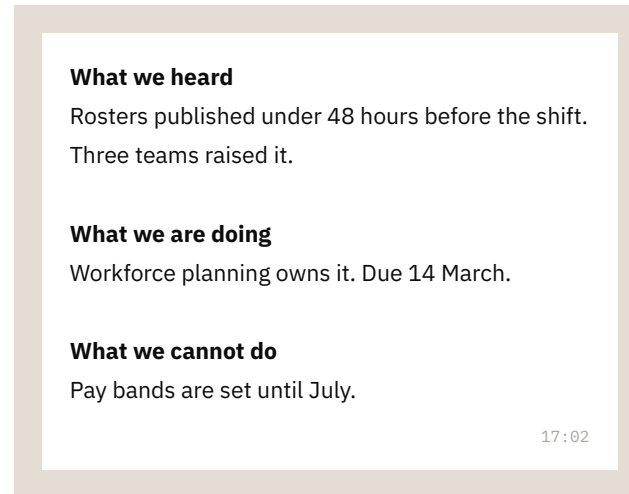

Assets

Channels

WhatsApp, first contact

WhatsApp, closing the loop

Why there is no branding in the message

No logo, no colour and no header image. The employee already knows who sent it, and every decorative byte is billed.

Template category

Submit as utility rather than marketing. Utility is roughly six to eight times cheaper in Indonesia. The category is decided by the platform, not by us, and it moves the unit economics directly.

Turn count

Billing has been per message since July 2025, so each conversational flourish carries a price. Structured exchanges beat chatty ones.

The second paragraph

The privacy mechanic appears in the first message, before any question. That sentence is doing more work than the survey design.

Imagery

Direction

Documentary rather than staged. Real working environments: warehouse floors, contact centre rows, shift handovers, depot yards.

People

Where someone appears they are working. No posed portraits and no eye contact with the camera.

Treatment

As shot. No duotone, no brand-colour wash and no grading toward teal and orange. Crop wide so that the environment reads as the subject.

Not used

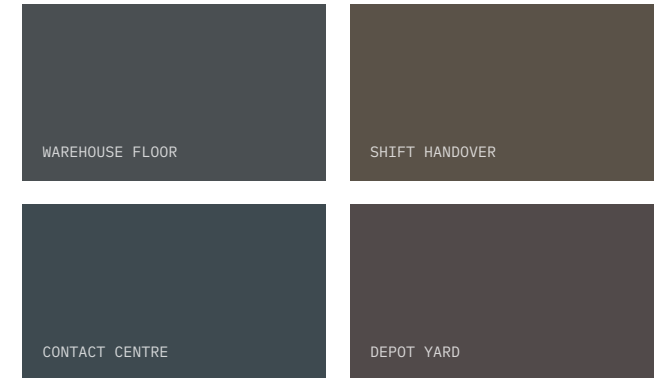

Stock photography of colleagues laughing around a laptop, spot illustration, character art, isometric scenes and three-dimensional renders.

Diagrams instead

Where something needs explaining, draw the mechanism. The diagrams in this document are the house style.

Product imagery

Real screenshots with names redacted. Never a mockup containing placeholder text.

Indicative grounds. Commission rather than licence where budget allows.

Off brand

Why this is specified

The category is full of products that look interchangeable, and the current default aesthetic for AI software is the fastest available route to looking like one of them.

The check

If a screenshot could be dropped into a generic software landing page without anyone noticing, it has failed.

On terracotta specifically

The retired Engage orange sat eight degrees from the accent now associated with a widely used AI assistant. Keeping it would have read as derivative to precisely the buyers this product needs to convince.

Required instead

Flat fills, hairline borders, generous space, one accent used sparingly, monospace numerals, diagrams in place of illustration, and sentences that name a person and a date.

Purple to blue gradients	Mesh gradients and aurora blurs	Glassmorphism and frosted panels
Glow, neon edges and coloured shadows	Inter, Poppins and Montserrat	Rounded corners on every container
Three-dimensional blobs and spheres	Isometric illustration	Sparkle and wand icons for AI
Stock photography of laughing colleagues	Emoji in the interface	Neon accents on dark marketing pages
Terracotta and amber accents	Numbers that count up on load	Skeleton shimmer
Confetti and celebration states	Illustrated mascots	Tinted callout boxes

Print production

Colour

Vega, coated	Build to CMYK and proof. There is no exact Pantone match.
Vega, uncoated	Shifts green on uncoated stock. Request a wet proof.
Cosmos	Rich black: 60 40 40 100. Never 100K alone on large areas.
Halo	Leave as the paper where possible rather than printing a flat tint.

Stock

Use uncoated stock at 120gsm and above for documents and 300gsm for cards, without gloss lamination.

Reproduction

Minimum print size	Seal 6mm, lockup 24mm
Embroidery	Seal only, minimum 20mm, single colour
Engraving and etching	Seal only. The aperture must stay open at final size.
Screen print	Single colour. Do not attempt a two-colour lockup below 40mm.
Signage	Cut vinyl or routed. Do not add a keyline.

What to avoid

Foil, emboss, spot varnish and any finish that adds a highlight to the mark. The seal is a flat form and every reflective treatment reads as an attempt to make it look expensive.

Proofing

A physical proof is required for anything produced in quantity above one hundred, and for any application where Vega appears at full bleed.

Files

Supply outlined vector with no live text, in CMYK for print and RGB for screen. Never send an RGB file to a printer and never convert a PNG.

Environment and merchandise

Applied to space

The seal at large scale, cut or painted, in Vega on a Cosmos ground or Cosmos on a light wall. No lockup above two metres, because the wordmark stops being read and starts being decoration.

Wayfinding

Plex Sans at high contrast. Arrows follow the reading direction of the local language.

Merchandise

Approved	Notebooks, enamel pin, tote, cap, water bottle
Not approved	Anything that jokes about the product or the category
Colour	Cosmos or Halo garments only. No Vega garments.
Mark	Seal alone, single colour, small and off-centre
Never	A slogan on a garment

Why the restraint

The product is sold to people who are sceptical of employee engagement culture. Branded enthusiasm undermines the argument faster than anything in the interface.

Frontline gifts

Where merchandise is given to a workforce rather than to a buyer, it should be useful on shift. A branded lanyard or bottle is appropriate; a novelty item is not.

Presentations

Structure

Cover	Cosmos, lockup at the top left, title at the base
Section	Cosmos or Vega, number and title only
Content	White, one idea per slide
Data	White, chart at the right, reading at the left
Close	Cosmos, open questions and contact

Rules

One idea per slide, and the takeaway written as the slide title rather than as a topic label. Write Closure rate fell to 38 per cent, not Closure rate.

Body text no smaller than 16pt. If it does not fit, the slide holds too much.

No slide transitions, no build animations and no speaker-note text pasted onto the slide.

Charts in decks

Same rules as the product: Vega primary, Ink 500 comparison, sample size beside every percentage, and no truncated axis.

Screenshots

Screenshots must be real, current and redacted, and any screenshot older than one release is withdrawn.

Template

One deck template exists. Slides built outside it are not used in front of a customer.

Logo animation

The only approved reveal

The aperture scales from 0.9 to 1 over 200 milliseconds on the standard curve, with the outer form static. Nothing else in the mark moves.

Where it may be used

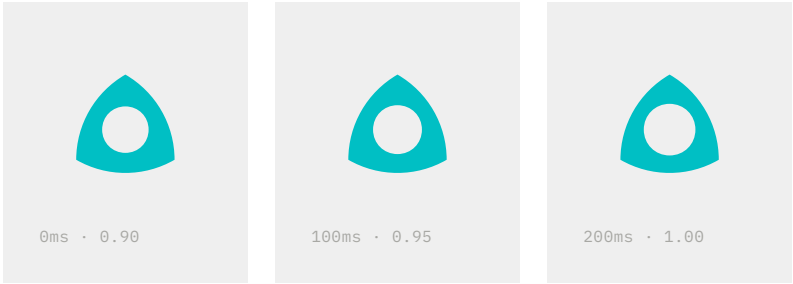

Application launch, the first frame of a video, and the loading state of the web application. Not in the interface after launch and not on a marketing page.

Loading states

The seal is not used as a spinner. A loading state uses a plain indeterminate bar in Vega, because a rotating logo trivialises the mark and a pulsing one is difficult to look at.

Video

Hold the static lockup for at least one second before any cut. No sound is attached to the mark.

Duration	200ms
Curve	cubic-bezier(.2, 0, .2, 1)
Property	transform: scale on the aperture only
Repeat	Never
Reduced motion	Show the final frame immediately

Naming

First mention	Actio, a Lumofy product
Primary lockup	Lumofy Actio
Interface	Actio, with the Lumofy wordmark in the account area
Legal and contracts	Lumofy — Actio
Arabic	أكتيو, and لوموفاي أكتيو for the parent lockup
Domain	lumofy.com/actio or actio.lumofy.com
Spoken	ACT-ee-oh. Confirm in the first call so it does not drift.
Never	Actio presented alone in a commercial context

Position in the suite

Actio is a product of Lumofy and never a standalone company. It inherits Cosmos, Halo, the celestial naming convention, the node and connector grammar and the type stack, and contributes one hue and one closed form.

Engage

Retired. Its marks in both English and Arabic are superseded and should be removed from the asset library rather than archived beside current files.

Future sub-products

Any product beneath Actio takes a tint of Vega rather than a new hue. The wheel is full.

Grammar

Actio is never pluralised, used as a verb, or made possessive.

Trademark

Marks owned

The word Actio within the Lumofy lockup, the seal, the Arabic form أكتيو, and the phrase Feedback that closes.

How the name is presented

Actio always appears with the Lumofy house mark in commercial contexts. The house mark is what distinguishes the product name from unrelated marks in adjacent software categories, and presenting Actio alone is prohibited throughout this document.

Grammar of the mark

Actio is a proper noun. It is never pluralised, used as a verb, made possessive, or combined with another word to form a new name.

Permitted to third parties

Stating that a product integrates with Lumofy Actio, using the horizontal lockup unmodified and with correct clear space.

Not permitted

Use of the seal alone, incorporation of the name into another product name or domain, modification of any mark, application to merchandise, or any implication of endorsement.

Attribution

Where a third party reproduces a mark, the accompanying text reads: Actio and the Actio seal are marks of Lumofy.

Revision

These guidelines may be revised at any time, and use of the assets constitutes acceptance of the current version.

Enquiries

Requests to use a mark outside these terms are directed to the brand owner at Lumofy before any material is produced.

Assets

Logo	Seal in Vega, Cosmos, white and Halo. Horizontal, vertical, parent and Arabic lockups. App icons at 512, 192, 180, 64, 32 and 16. Favicon, avatar and open graph image.
Type	Source Sans 3 and IBM Plex Sans, Mono and Sans Arabic, self-hosted as WOFF2 and subset to Latin, Latin Extended and Arabic.
Tokens	A single tokens file emitting CSS custom properties, Tailwind configuration and native resources for colour, type, spacing, radius and motion.
Components	Build order: button, input, select, status pill, card, table row, empty state, toast, modal, navigation shell.
Channels	WhatsApp templates submitted as utility. Employee update message. Manager assignment email. SMS fallback under 160 characters.
Accessibility	WCAG 2.2 AA, with a contrast check in continuous integration.
Documentation	This document for people and BRAND.md for agents, versioned together. A change to one without the other is a defect.

Before the first commit

Tokens exist, fonts are self-hosted, the seal files are in the repository and a contrast check runs in continuous integration.

Before the first customer

Trademark cleared, Arabic weights confirmed against the Lumofy marks, and WhatsApp templates approved in the utility category.

Before launch

Dark mode verified on every screen, and all four language settings proofed by a native speaker on a physical device.

Colophon

This document governs the Actio brand. Where a rule here conflicts with a design decision, the rule stands until the document is revised.

Typefaces	Source Sans 3 and IBM Plex Sans, Mono and Sans Arabic
Mark	Reuleaux triangle, circumradius 33 on a 100 unit grid, with a circular aperture at r15
Accent	Vega, hue 182, the remaining gap in the Lumofy wheel
Contrast	WCAG 2.2 AA. Every pair in this document measured, not estimated
Languages	Bahasa Indonesia, English, Tagalog, Arabic
Companion	BRAND.md, the machine-readable specification for build tooling
Assets	logo/README.md, covering every lockup, colourway and format
